GENERAL INFORMATION

Shears designed to cut quickly, in a single operation with precision, samples of Paper, Foils, Films ..., of a width determined by the model and 260 mm long.

- **Easy to use**
- **Safety of use**
- **Robust design**
- **With security screen**

With a fixed blade and two movable ones made of special tempered and ground steel. By lowering the arm with the two moving blades, a hold-down plate is activated on the sample to hold and smooth the sample before cutting, thus obtaining samples with greater accuracy in their width dimensions.

Equipped with a safety protector, which avoids introducing the operator's hands between the blades and the cutting base, during the sample cutting process.
